GLOSSARY OF SELECTED TERMS

AUDIOVISUAL MATERIALS Nonbook library materials, such as recordings, transparencies, tapes, slides, films, and filmstrips, which require the use of special equipment in order to be seen or heard.

BIBLIOGRAPHIC VOLUME A unit of publication distinguished from other units by having its own title page, half title, cover title or portfolio title. In connection with periodicals, the publisher's volume.

BOOK A unit of publication, either bibliographically independent or a volume in a series published under the same title, consisting of leaves, sheets, or signatures sewn or otherwise bound together, covered or uncovered. Bound volumes of periodicals and newspapers are not considered books.

CATALOGED MATERIAL Any library material which has been identified in a catalog which records, describes, and indexes the resources of a library; as distinct from library materials which are merely physically arranged for use and are not indexed and described individually by item.

CIRCULATION The activity of a library in lending its resources to borrowers. For statistical purposes, photocopies provided in lieu of circulation should also be included. Count one for each loan of a book, serial, or nonbook item.

GOVERNMENT DOCUMENT Any publication in book, serial, or nonbook form bearing a government imprint, e.g., the publications of federal, state, local, and foreign governments and of world organizations, such as United Nations, European Common Market, etc. Government documents held in a separate documents section of the library are counted as Documents. Documents which are fully cataloged and intershelved with books are counted as Book Stock. Periodicals which bear a government imprint but are treated as part of the periodicals collection are counted as Periodicals. Documents held in vertical files with other ephemera are counted as Pamphlets.

MICROCARD An opaque card containing images photographically reduced to a size too small to be read without magnification.

MICROFICHE A microfilm sheet containing multiple images in a grid pattern.

MICROFILM A strip of film containing photographic images usually too small to be read without magnification. Microfilm has been discountinued as a separate category in the annual report.

MICROFORM Any library material which has been photographically reduced in size for storage and protection purposes, and which must be read with the help of enlarging instruments. Microform is now included within the count of the various types of materials such as books or periodicals. A microcopy of a volume of adult nonfiction is counted as a title and volume of Adult Nonfiction under Book Stock, for example.

NEWSPAPER A serial publication issued at stated and frequent intervals (usually daily, weekly, or semiweekly), which reports events and discusses topics of current interest, and is usually a "primary source" of information to its readers.

NONBOOK MATERIALS Those library materials which do not meet the definition of a book or periodical, such as, audiovisual materials; vertical file materials and similar items which are not individually cataloged; and any other material the form of which requires special handling.

PERIODICAL A serial publication which constitutes one issue in a continuous series under the same title, usually published at regular intervals over an indefinite period, individual issues in the series being numbered consecutively or each issue being dated.

REFERENCE QUESTION Any request for information or aid which requires the use of one or more sources to determine the answer or utilizes the professional judgement of the librarian.

SERIAL A publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies; they may include monographic and publishers' series.

TITLE A term used to designate a printed publication which forms a separate whole, whether issued in one or several volumes. A title is a holding for which a separate shelflist card has been made.

VOLUME For statistical purposes, a volume is a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and/or made ready for use.

NOTE: LIBRARY HOLDINGS. From the 1968 annual report transfer Holdings, December 31, 1968, of all types of materials to the 1969 annual report under Holdings, December 31, 1968. If for any reason the figures on the 1969 report differ from those on the 1968 report, please footnote and explain the difference. Figures may differ because a new inventory has been taken, because a mistake was made in last year's report, etc.

NOTE: MICROFORM. Microfilm has been discontinued as a separate category in the annual report. Microform (microfilm, microcard, microfiche) is now included within the count of the various types of materials. For example, a microcopy of a volume of adult nonfiction is counted as a title and volume of Adult Nonfiction under Book Stock.

BOOK STOCK - A library's collection of books (including paper bound books) and other materials which is prepared and recorded in the same manner as books.

These books and materials must be cataloged and available for use. Foreign language books and books on rental shelves should be included in Adult (or Juvenile) Fiction or Nonfiction. Young adult books should be included with the Adult collection. Do not include bound periodicals in Book Stock. See also definitions of MICROFORM, SERIALS COLLECTIONS, and GOVERNMENT DOCUMENTS.

TITLES - For this report, a title is a book holding for which a separate shelf-list card has been made. Thus, six copies of the same edition of a book count as one title; two editions of the same title count as two titles; a set of six books which have been cataloged as separates count as six titles; a set of books (i.e., an encyclopedia) cataloged as a set counts as one title; and two sets of the same edition cataloged as sets (i.e., two sets of Americana, 1962) count as one title. Enter the number of different titles held, added by purchases and gifts, and withdrawn.

A library which cannot easily count the number of shelflist cards (or physical items) in each category, may wish to establish a title count base in the following manner.

1. Count the number of titles in 1 inch of shelflist.
2. Repeat step 1 at random intervals throughout the shelflist.
3. Average the number of titles per inch.
4. Multiply the average titles per inch by the number of inches of cards in the shelflist.

After the base count is established (for 1966 or 1967) make an actual count of titles added and withdrawn in subsequent years.

VOLUMES - Enter the number of volumes held, added by purchase and gifts, and withdrawn, including duplicate copies of titles and the number of volumes in sets of books.

PAGE 3 of REPORT - LIBRARY HOLDINGS AND CIRCULATION

OTHER SERIALS - Enter here the current subscription titles and bibliographic volumes for serials other than periodicals and newspapers (see definition of SERIALS COLLECTION above) held in a serials section of the library and not counted as Book Stock. Other Serials bought occasionally rather than on standing order and cataloged as Book Stock may be counted as Book Stock.

INSTRUCTIONS FOR THE ANNUAL REPORT
of
PUBLIC LIBRARY SYSTEMS - 1969

GENERAL -

This annual report is to be returned to the Division of Library Development by February 1, 1970.

The system report covers the activities of the system only. In the printed statistical report for 1969, the individual annual reports of the member libraries of federated or cooperative systems will be consolidated by system.

Consolidated systems will find some parts of the report not applicable. Please complete as much as possible.

PAGE 1 OF REPORT -

STREET AND MAILING ADDRESS - Be sure to include Zip Code.
NUMBER OF MEMBER LIBRARIES - Number of chartered units which are members of cooperative or federated library systems as of December 31, 1969.
NUMBER OF OTHER OUTLETS - Number of stations or branches operated by the system. Attach a current bookmobile schedule and a list of locations of other outlets.

SYSTEM HOLDINGS AND CIRCULATION -

NOTE: LIBRARY HOLDINGS - From the 1968 annual report transfer Holdings, December 31, 1968, of all types of materials to the 1969 annual report under Holdings, December 31, 1968. If for any reason the figures on the 1969 report differ from those on the 1968 report, please footnote and explain the difference. Figures may differ because a new inventory has been taken, because a mistake was made in last year's report, etc.

NOTE: MICROFORM - Microfilm has been discontinued as a separate category in the annual report. Microform (microfilm, microcard, microfiche) is now included within the count of the various types of materials. For example, a microcopy of a volume of Adult Nonfiction is counted as a Title and a volume of Adult Nonfiction under Book Stock.

HOLDINGS - Library materials to which the system retains title and which are not reported by a member library. This should include all materials given to the system under the Central Book Aid program. This may also include materials secured through Federal programs such as LSCA and ESEA.

BOOK STOCK - The system's collection of books and other materials which is prepared and recorded in the same manner as books. These books and materials must be cataloged and available for use. Foreign language books should be included in Adult (or Juvenile) Fiction or Nonfiction. Young Adult books should be included with the Adult collection. Do not include bound periodicals in Book Stock. See also definitions of MICROFORM, SERIALS COLLECTIONS, and GOVERNMENT DOCUMENTS.

TITLES - For this report, a title is a book holding for which a separate shelflist card has been made. Thus, six copies of the same edition of a book count as one title; two editions of the same title count as two titles; a set of six books which has been cataloged as separates counts as one title; and two sets of the same edition cataloged as sets (i.e., two sets of *Americana*, 1962) count as one title. Enter the number of different titles held, added by purchases and gifts, and withdrawn.

A system which cannot easily count the number of shelflist cards (or physical items) in each category, may wish to establish a title count base in the following manner:

1. Count the number of titles in 1 inch of shelflist cards.
2. Repeat step 1 at random intervals throughout the shelflist.
3. Average the number of titles per inch.
4. Multiply the average titles per inch by the number of inches of cards in the shelflist.

After the base count is established (for 1966 or 1967) make an actual count of titles added and withdrawn in subsequent years.

VOLUMES - Enter the number of volumes held, added by purchase and gifts, and withdrawn, including duplicate copies of titles and the number of volumes in sets of books.

SERIALS COLLECTION - A serial is a publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings and transactions of societies; they may include monographic and publishers' series. See also definitions of MICROFORM and GOVERNMENT DOCUMENTS.

CURRENT SUBSCRIPTION TITLES - Enter the number of different subscriptions held, added by purchase and gifts, and withdrawn. Two subscriptions to the same serial count as one title.

BIBLIOGRAPHIC VOLUMES - A bibliographic volume is the unit established by the publisher as a volume. Enter the number of bibliographic volumes held, added by purchase and gifts, and withdrawn, including duplicate copies of volumes, regardless of whether the material is bound, unbound or on microfilm or microcards.

OTHER SERIALS - Enter here the current subscription titles and bibliographic volumes for serials other than periodicals and newspapers (see definition of SERIALS COLLECTION above) held in a serials section of the library and not counted as Book Stock. Other serials bought occasionally rather than on standing order and cataloged as Book Stock may be counted as Book Stock.

PAPERBOUND BOOKS - Libraries circulating paperbound books which are not cataloged should enter the total at the bottom of page 1 of the report.

PAGE 2 OF REPORT

NONBOOK MATERIALS - Those library materials which do not meet the definition of a book or a serial, such as audiovisual materials, vertical file materials, and any other material the form of which requires special handling.

bear a government imprint but are treated as part of the periodicals collection are counted as Periodicals. Documents held in vertical files with other ephemera are counted as Pamphlets.

CIRCULATION - Direct circulation to system headquarters staff and to patrons handled by the system. Do not include here materials sent to member libraries. Two separate reportings of circulation statistics are requested: 1) by books, serials, and nonbook materials; and 2) by total bookmobile circulation and total circulation in other outlets. Systems using transaction cards may make adjustments as needed.

INTERLIBRARY LOAN MATERIALS BORROWED FOR SYSTEM PATRONS should be used to record materials borrowed by the system as the result of a specific author, title or subject request for use by the system headquarters staff or for patrons handled by the system. Do not include here materials sent to member libraries.

INTERLIBRARY LOAN MATERIALS SUPPLIED should be used to record intrasystem materials sent to member libraries as the result of a specific author, title or subject request made by an individual patron. Do not include rotating collections as a part of these figures.

REFERENCE QUESTION is defined as "a request for information or aid which requires the use of one or more sources to determine the answers or utilizes the professional judgment of the librarian." Requests for "a good book of criticism of American art," "height of Empire State Building," or "how to set up a system of accounts for a small business" are to be counted as reference questions. Questions should be counted at the location where they are answered.

ACCOUNTING
FOR
COOPERATIVE LIBRARY SYSTEMS
IN
NEW YORK STATE

Revised

THE GENERAL SETTING OF LIBRARY SYSTEM ACCOUNTING AND REPORTING

There are many systems, and variations on systems, of accounting and reporting to be found in the business world at large. Some are relatively simple; others require considerable training to keep the records and to analyze the resulting data. Each system is basically designed to further the successful management of the task to which it is applied.

These records provide a demonstration of the public stewardship of the library system board of trustees, the system officers and the administrators. They should be audited periodically by competent and disinterested parties and the resulting reports made public. For purposes of public reporting and comparison, a standard system of terminology, classification and reporting is desirable. Local adjustments should be built around compliance with these factors. Nothing is so permanent about accounting and reporting that it cannot be changed. However, changes should be made only if they will make for more successful administration.

The accounting process involves a number of successive, interlocking and cross-checking steps. In terms of the general practice in New York State, financial accounting normally begins with the receipt of a given sum of money, or of an invoice or claim for payment, and ends with the recording of the approved expenditures on the accounting forms and the clearance of the checks through the bank accounts. Many systems will extend their accounting process back to a point earlier than that established by actual receipt of revenues or claims for payment. Some will use supplementary records to indicate potential income from the time it is earned and becomes due. Many will also encumber their expenditure accounts from the moment purchase orders are issued or other financial commitments are made, instead of awaiting actual delivery and subsequent billings.

The important thing to bear in mind regarding the entire accounting process is the need for completing each of the prescribed steps in the recommended pattern. It is also essential that the various functions be accomplished by the separate officers or employees designated, and that each of these people maintain in usable order a complete and accurate record of his actions. The necessary comparisons and provings of the independent records should be undertaken at the proper intervals. Then the safeguards against individual errors, or possible malfeasance in office, will be able to operate properly and an undesirable situation can be promptly corrected.

There are some internal portions of the accounting records maintained by one officer or employee which cannot be cross-checked item for item with a corresponding record of another person. The distribution ledger accounts of the financial clerk are an example of this. A correct and consistent maintenance of the data by the responsible individual is therefore essential from both an operational and an analytical point of view. The system trustees and the director have special responsibilities to see that the delegated persons in such cases have a clear concept of what has been the practice in the past and what is to be expected in the future.

ACCOUNTING DUTIES OF THE TREASURER

The treasurer is the official custodian of the funds of the system. The accounting functions of the treasurer are to keep track in a general way of the revenues received and expenditures made, as they apply to each fund of the system, and to check his records periodically with the bank statements. Another important function is to sign the checks, indicating that moneys are on hand in the proper bank account to cover the indicated expenditures. The treasurer should be bonded for the amount of money available in checking accounts at any one time during the year.

In carrying out his duties, a system treasurer should observe the following conditions:

- In theory all moneys due the system should be turned over to the treasurer for deposit in the bank and accounts designated by the board. In actual practice it is often advisable for the board to designate others from time to time to deposit certain moneys since it is often easier for such persons to get to the bank more frequently and with greater ease than the treasurer.

- For all moneys actually received by him for deposit, and for all duplicate deposit slips forwarded to him indicating a deposit by others, the treasurer should execute a printed press-numbered, triplicate receipt form.[1] The original is given to the source of the receipt, one copy is sent to the financial clerk and the other retained in bound form in the receipt book as the treasurer's copy.

- On the basis of his copies of receipt forms, the treasurer should post in the cash book furnished him by the system a chronological record of moneys received. A separate record page should be kept for each deposit account, or sufficient columns should be available on a single page to segregate receipts in each account.

- In small systems no internal breakdown of the receipts in each bank account is necessary. In no event does it seem justified that the treasurer's receipt headings should be broken down in the numerous types required in the accounting records of the clerk.

- Prior to the time any check of the system may be mailed, the check itself and a duplicate copy of the voucher check order must be presented to the treasurer. On the basis of the checking account to which the expenditure is assigned as found on the duplicate voucher check order, the treasurer must first ascertain from his cash record book whether sufficient funds exist in the particular account to meet payment of the check. If so, he then signs the check and follows the designated procedure for ultimate distribution of it to the payee. He keeps the duplicate voucher check order on file as the basis for his entries of expenditures in his cash book.

- Paralleling the receipts record in the cash book, the treasurer should keep a simple cash expenditures record for each bank account. He should have a copy of each duplicate voucher check order as a basis for making his entries. A separate page might be used for each bank account or a single page with sufficient columns to segregate expenditures of each account may be employed, depending on how the receipts records are established. Here again little or no internal columnar breakdown of expenditures is needed by the treasurer other than a possible two-category style of "salaries" and "other purposes."

---

[1] *Regulations of the Commissioner of Education*, Section 101-6, subd. 3-e.

The expenditure record will normally consist of a chronological listing of the checks drawn on each account. It therefore also becomes a check register. If separately identified checks are not employed for each checking account, then blocks of consecutively numbered checks for the principal account may be set aside for use with the infrequently used checking accounts. The headings on the checks will have to be altered so as to indicate the applicable bank account involved.

It is possible for the treasurer to record as expenditures only the totals appearing on the schedules or payrolls and to indicate under the check number column the first and last of the consecutively numbered checks used to make all of the individual payments embodied in the schedule or payroll.

- The treasurer from time to time must establish cumulative totals of the receipts and expenditures credited to each account as found in his cash book. Such expenditures as of a given date subtracted from the receipts up to the same period of time yields the balance on hand in the account. This also gives the information needed by the treasurer prior to affixing his signature to any check, as discussed above.

- At the end of each month the treasurer must establish the cash balance in each bank account as indicated by the receipts and expenditure entries in his cash book. He then secures bank statements for each of the checking accounts and adjusts the stated bank balance of each for any moneys he may have received but not yet deposited and for any checks issued but not yet cleared through the bank or for service charges made by the bank and charged against the account. The "adjusted" bank balance thus obtained should agree with the balance his cash book indicates is in each account. For any deposit or nonchecking accounts that may be in force, the balance shown in the account pass book rather than a reconciled bank balance should agree with the treasurer's cash book records.

ACCOUNTING DUTIES OF THE FINANCIAL CLERK

The Regulations of the Commissioner of Education speak only of a financial clerk and not of a business management official in terms of specific accounting functions. Quite often, however, the duties of the clerk are actually performed by some of the administrative and clerical staff.

The financial clerk is responsible either by direct action on his part or through responsibility delegated to others by the board for the maintenance of the detailed financial accounting records of the system. In addition, the final clerical audit of claims for payments, the preparation of bills, payment schedules and checks prior to payment approval by the board and the maintenance of subsidiary records on such items as withholdings and deductions from salaries are all accomplished in the name of the clerk. The importance of these matters to effective administration makes close observance of the following steps and procedures essential:

- From the duplicate deposit slips received from the treasurer, the financial clerk should establish a receipts ledger indicating in distributed form the various classifications of receipts deposited. The receipts for each fund and each bank account - either checking or depository - should be accounted for separately. Whenever separately earmarked moneys may be comingled in the same bank account, as happens with moneys borrowed for different capital purposes and placed in a single Construction Fund, subsidiary records should be kept in addition to the control forms for the entire account which will account separately for the receipts of each type of earmarked money. The distributed columnar headings for each type of receipts ledger should include at least those classifications of receipts which will be required in the annual financial report rendered to the State Education Department.

- On the basis of the annual budget as approved or adopted, the clerk should establish expenditures ledgers which will indicate in detailed form the types of budget expenditures which will be made. Similarly, expenditures ledgers should be prepared for each other fund or account established by appropriate action of the board. The columnar headings should indicate at least the detail of expenditure breakdown which will be required in the annual financial report rendered to the State Education Department.

- With respect to the expenditure ledgers the clerk initially enters the amount of money which has been appropriated for the particular item. (Red ink is oftentimes recommended for this entry because of its distinctive color.) Space is also left immediately following so that transfers of moneys among the appropriations as adopted by board resolutions, or additional receipts, may be entered.

- The clerk is responsible for the proper assembling of all bills prior to their submission to the board or auditor for approval or payment. He establishes that each item or service stated on the invoice has been acknowledged by a responsible employee as being received or performed. He also properly codifies the payment as to the fund and account title from which it is to be paid. By comparing each expenditure against the proper budget appropriation, he determines that the expenditure can be made within the balance of the appropriation remaining or that a transfer or additional appropriation may be required. He also prepares the necessary checks on the triplicate copy, press-numbered voucher check forms and places the invoice in the third or voucher copy of the check, adding the appropriate voucher number. As a final step prior to board approval, he lists all bills to be presented on a schedule of bills in accordance with the voucher and check number sequence. He also prepares the payroll warrants and the necessary payments.

- Following approval of the issuance of each check the clerk enters the payment in accordance with the numerical sequence of the checks in his expenditures ledgers. He also files the second carbon or voucher order copy of the check with the invoice enclosed in numerical sequence and forwards the original check and first copy of the check to the treasurer so that the latter may sign the original check and post the expenditure in his record from the carbon copy. Whenever the payroll is not operated through a separate Payroll Checking Account and all such checks are drawn on the General Fund, the clerk does not have to enter each individual payroll check on his ledgers if a copy of the warrant is filed with him. Instead he can indicate the first and last check of sequence involved and show the total payments as a single line distribution. All other checks should be individually recorded, however.

- At least monthly the clerk should establish a cumulative-to-date footing for each expenditure account title and the total expenditures from each bank account. These latter should be subtracted from the receipts to date in each bank account and the balance established. The clerk's balance should agree with the treasurer's balance in each case, excluding any receipts the treasurer may show as having been received but not yet deposited.

The above statements of responsibilities of the treasurer and financial clerk do not cover all the details which may be involved in each of their jobs.

They do, however, outline the major activities which they undertake that revolve around the financial accounting program for a system.

REGULATIONS OF THE COMMISSIONER OF EDUCATION

101-c - FINANCIAL ACCOUNTING IN COOPERATIVE LIBRARY SYSTEMS AND REFERENCE AND RESEARCH LIBRARY SYSTEMS

1 The fiscal year of each cooperative library system shall begin with the first day of January and end with the 31st day of December, or at the option of the library system, shall begin with the first day of July and end with the 30th day of June.

2 No trustee, officer or employee of the system shall be interested directly or indirectly in any claim against or contract with the system except for lawful compensation and expenses. However, a trustee who is not the treasurer may be a stockholder, officer or director of a bank designated as depository for the system.

3 The board of trustees of every cooperative library system shall:

a Appoint two separate accounting officers; a financial clerk and a treasurer, who shall hold office at the pleasure of the board. The secretary of the cooperative library system board or the library system director may be appointed the financial clerk. In the event that either of these officers becomes temporarily incapacitated the board may appoint one of its members to serve temporarily in either of these positions.

b Provide a satisfactory minute book for recording the minutes of the meetings of the board of trustees and the proceedings of the annual meeting of the trustees of the participating libraries. In this minute book the secretary shall record the action of the board on all bills approved for payment or shall refer to a schedule of such bills by date, schedule number and amount approved. This schedule shall be filed as a public record.

c Provide the financial clerk with a distribution ledger in which he shall record itemized receipts and itemized payments, which shall be classified in each case as is required for the annual financial report.

d Provide the treasurer with a cashbook in which he shall enter an itemized record of all receipts and payments.

e Adopt a prenumbered receipt form printed in triplicate, and require the treasurer to acknowledge the receipt of any library funds paid over to his custody by issuing his receipt as follows: a copy to the payer, a copy to the financial clerk and a copy to be retained by the treasurer.

f Adopt a prenumbered voucher-check and require the use of this form in paying all system obligations except as otherwise provided in paragraph r. This form must provide for the signature of the treasurer and may provide for as many additional signatures as the board may require.

g Adopt at least 30 days prior to the start of the ensuing fiscal year an estimate of receipts and appropriations (annual budget) on forms prescribed by the Commissioner of Education, and file such budget with the Department within 60 days thereafter.

h Amend the budget at any time during the fiscal year and provide for appropriations from any additional revenues received.

i Keep the incurred obligations in each fiscal year within the amounts authorized by the budget and amendments thereto.

j Settle all accounts of the library system on or before December 31.

k Disburse library funds only on the basis of itemized vouchers which have been certified by the claimants and audited and approved by the board of trustees except as otherwise provided in paragraph r. However, the board of trustees may by resolution determine that vouchers may be audited and approved by a committee comprised of at least three board members or by an individual designated by the board as auditor. Any individual so designated may not hold the office of financial clerk or treasurer and shall be bonded with such penalty and sureties as the board may require.

l Provide by resolution that amounts due upon contracts, for fixed salaries or for compensation of employees regularly engaged at agreed periodic rates, may be paid without prior audit upon submission to the treasurer of a voucher or payroll duly certified by the library system director or his duly authorized representative.

m Establish rules and regulations governing the reimbursement of trustees, officers and employees of the system and its member libraries for actual and necessary expenses incurred in the performance of official duties assigned by the trustees of the library system or in attending meetings designated by the library system board of trustees. In lieu of actual and necessary travel expenses, the trustees may establish a mileage rate for the use of personally owned automobiles.

n Require the treasurer to render monthly reports, showing the following information for the guidance of the board: balance on hand at the beginning of the month; itemized list of receipts during the month; total withdrawals made from the bank account during the month; balance on hand at the end of the month and reconciliation with the bank statement.

o Require a monthly report from the financial clerk showing amounts of receipts by source and expenditures by budget category for the month and year to date.

p Cause an annual audit of the treasurer's records to be made either by a committee of the board or by an independent auditor.

q Provide adequate filing equipment for the preservation and systematic arrangement of all paid and unpaid bills, cancelled checks, bank statements, debit charge slips, contracts and other financial records.

r At its discretion, establish a petty cash fund for the purpose of making payment in advance of authoriaation of properly itemized bills for materials, supplies or services furnished to the library system calling for immediate payment on delivery.

(1) Whenever a petty cash fund is established the board shall designate the director or the financial clerk of the system to administer and be responsible for such fund. No such fund shall exceed $50 at any one time.

(2) The person in charge of such petty cash fund shall keep such records as may be necessary for the accurate accounting of all transactions and shall make reports to the board of trustees as required by such board.

(3) From time to time checks may be drawn to the person designated to administer the petty cash fund in an amount which shall not exceed payments made in cash as indicated by receipts, receipted bills or other evidence of payment in form available to audit.

(4) The petty cash fund shall be completely closed out at the end of each year and the general fund reimbursed by the original amount transferred to the petty cash fund.

s The treasurer shall deposit all moneys within 5 days after receipt in a depository designated by the trustees. The trustees may authorize the treasurer to deposit or invest moneys not required for immediate disbursement in special time deposit accounts or certificates of deposit issued by a bank or trust company located and authorized to do business in this State, provided that such account or certificate of deposit shall be payable within the time the moneys shall be needed, and provided further that such account or certificate of deposit shall be secured by a pledge of obligations of the United States of America or obligations of the State of New York. Investments may also be made in obligations of the United States of America or of the State of New York, registered or inscribed, when possible, in the name of the system, and payable or redeemable at the option of the system within such time as the proceeds shall be needed, but in any event not later than the end of the fiscal year. Such obligations shall be purchased through, delivered to and held in the custody of a bank or banker designated by the trustees for the deposit of system money.

4 The trustees of each cooperative library system shall file with the State Education Department, on forms provided by it, a financial report of the preceding fiscal year within 60 days of the close of such fiscal year.
